### Patriot Root Cutter Kit

**The Patriot 1 and 2 Root and Grease Cutters are capable of developing pressure and torque to remove the most difficult stoppages from 4" to 20" pipe diameters. This patent pending unique design combines both roller and skids to stabilize and "Roll" the root cutter up the pipe with minimal friction. Less water is used, more roots are cut, and fewer trips are made to the fire hydrant which means more productive sewer cleaning. The rollers will guide the skid assembly over offsets and misaligned pipe, thus avoiding the possibility of getting hung up in the sewer line. The individual skids are adjustable which eliminates the need to change skids for each size pipe.**

**Kits includes:**
- Motor and Thruster
- 4" Skids (Ring Style) / 6" Fixed Skid (Non Rollers)

Venturi Style Vac Pump

Venturi Style Vac Pump
aka ‘The Poor Man’s Pumper’

When connected to a high pressure jetting hose, four streams of pressurized water shoot in a combined stream away from the pump intake. Thick slurry or sludge thins or liquefies from the addition of water from the jet streams.

Comes with 2” Dia Intake and 20’ of Discharge.
